## PROFESSIONAL SUMMARY

FullStack Developerspecializing in MERN Stack (React.js, Next.js MongoDB, Express.js, Node.js). Skilled in building secure, scalable web applications using RESTful APIs, JWT authentication, and responsive UI frameworks like Tailwind CSS. Strong in Python, SQL, and problem-solving with hands-on experience in full-cycle application development at Datavalley.ai.

## SKILLS

---

- Frontend: HTML5, CSS3, JavaScript-ES6+, React.js, Next.js, Tailwind CSS
- Backend: Node.js, Express.js
- Languages: Python,JavaScript
- Databases: MongoDB,SQL
- Tools: Git, GitHub, Visual Studio Code, Postman,

## EXPERIENCE

---

### Full Stack Developer Intern,     Datavalley.ai

August 2025 – Present

- Designed and developed responsive, user-friendly web pages, ensuring smooth performance across multiple devices.
- Built scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented a complete authentication flow, including user login functionality with secure backend validation and token-based authorization.
- Built and consumed RESTful APIs to fetch, send, and manage data, enabling seamless communication between the frontend and backend.
- Established strong frontend–backend integration by connecting React/Next.js interfaces with Node.js and Express services for real-time data handling.

## PROJECTS

---

### ShopVibe : E-Commerce Web Application

**Technologies:** Next.js, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed a full-stack web application by integrating a Next.js frontend with a Node.js and Express backend to handle real-time data operations.
- Implemented RESTful APIs in the backend and connected them with the frontend to fetch, display, and manage dynamic data efficiently.
- Designed responsive and modern user interfaces using Next.js, Tailwind CSS, ensuring a smooth user experience.
- Product Filtering & Cart Management- Users can easily filter products based on categories, price, or ratings and add selected items to the cart for a smooth shopping experience.

- Secure Payments & Order Tracking- The application supports secure payment methods and allows users to view their orders along with detailed order information.

## Food Delivery Website

**Technologies:** HTML, CSS, JavaScript

- Designed and developed a responsive food delivery website using HTML, CSS, and JavaScript.
- Created an interactive and user-friendly interface for browsing restaurants, viewing menus, and selecting food items.
- Implemented dynamic features such as add-to-cart, quantity updates, and price calculation using JavaScript.
- Enhanced user experience with smooth navigation, and interactive UI components.

## AI-Based Healthcare Monitoring System using Raspberry-pi

**Technologies:** AI-based algorithms, Diabetes management, ESP8266 module, NIR sensor, Raspberry pi 4B.

- Designed a modular health monitoring system using NIR sensor, ESP8266, and Raspberry Pi 4B.
- Collected sensor data via serial communication for smooth and flexible hardware integration.
- Processed data with a Python-based LSTM neural network for accurate glucose prediction.
- Expanded system to estimate additional health parameters such as cholesterol, hydration, blood pressure, and skin temperature.

## CERTIFICATIONS

---

- Web Development Fundamentals (HTML, CSS, JavaScript) – IBM
- Artificial Intelligence Fundamentals Certification – IBM
- Introduction to Cloud Computing Certification – IBM

## EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Bapatla Women's Engineering College

CGPA: 9.18

Intermediate

Lalitha Junior College

CGPA: 9.19

Secondary

ZP High School

CGPA: 9.7

2021- 2025

2019-2021

2018-2019
